The California Transportation Commission, in partnership with the California Department of Transportation (Caltrans), is beginning the process of updating the 2017 Regional Transportation Plan (RTP) Guidelines and the 2017 California Transportation Plan (CTP) Guidelines. The RTP Guidelines are intended to set forth a uniform, statewide, long-range, regional transportation planning framework; promote an integrated, multimodal, and cooperative planning process; and facilitate the efficient delivery of transportation projects that meet local, regional, and state goals. The CTP Guidelines provide direction to Caltrans on the development of the statewide long-range transportation plan, including identifying federal and state requirements.

Commission staff and Caltrans Division of Transportation Planning will be hosting a virtual kick-off meeting to inform the numerous and diverse government and non-government partners and stakeholders on the efforts planned to undertake a transparent and inclusive process for these updates.

Additional information regarding the RTP and CTP Guidelines can be found [online](#).

Stakeholders are welcome to attend via GoToWebinar or by phone. Additional meeting details and agenda materials will be made available prior to the meeting on the [Commission's website](#).
